POSTAL POSSIBILITIES.

TO THE EDITOR OF THE HERALD :-

In view of the prevailing interest in parcels post legislation some figures from the latest report of the British Postmaster General will be gladly read. In Great Britain the parcels post was established August 1, 1883. The first year 22,904,000 parcels were handled, the postage amounting to \$2,500,000, of which sum fifty-five per cent was paid to the railroads for transportation. * * The number of pleces handled in 1910-11 was 121,802,000; the gross receipts were \$12,300,000, of which the railroads received \$5,500,000 and the Post Office \$6,800,000. * In addition the Post Office delivered 1.044,100,000 "halfpenny (one cent) packages" and 196,300,000 newspapers, also charged one cent each.

The postal telegraph despatched \$6,707,000 messages, and the balances of depositors in the Postal Savings banks amounted to £168,890,215, or nearly \$480,000,000, with more than \$100,000,000 of government stock held for customers.

The profit of carrying mails, apart from a loss for telegraphs, was \$27,000,000.

EDWARD BERWICK, President Postal Progress League of California. In view of the prevailing interest in
